CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The unaudited bank and cash balances of the Group as at 31 March 2015 was approximately HK\$31,800,000. The Board considers the Group should improve the current bank and cash level of the Group for carrying out its acquisition and investment plan in new energy vehicle related project and development in Brazilian iron ore project, which are critical for the growth and development of the Group.

The Directors are of the view that the Placing can strengthen the financial position of the Group and provide working capital to the Group to meet any future development and obligations. The Placing also represents good opportunities to broaden the shareholders' base and the capital base of the Company. The Directors consider that the Placing is in the interest of the Company and the Shareholders as a whole.

LETTER FROM THE BOARD

As disclosed above, the maximum net proceeds will be approximately HK\$836.7 million. The net proceeds will be utilised in the following areas:

- (i) approximately HK\$593.7 million will be used in new energy vehicle related projects;

- (iii) the remaining HK\$117 million will be utilised as the general working capital of the Group or supplement the above two areas.

Further details on the use of proceeds has been set out in the section named “Use of Proceeds” in page 15 of this circular.

The aggregate Subscription Price of approximately HK\$499.5 million shall be payable in cash (or other form as agreed by the Company) by the Subscriber upon completion of the Subscription Agreement.

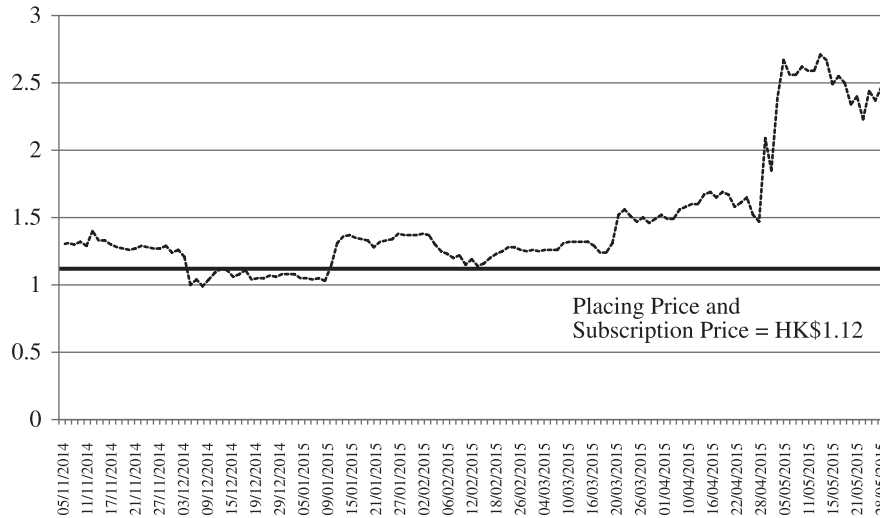

Placing Price and Subscription Price

In assessing the reasonableness of the Placing Price and Subscription Price under the Placing Agreement and Subscription Agreement respectively, the Board has reviewed the Share prices level during a period starting from 5 November 2014, being six months prior to the signing of the Placing Agreement and Subscription Agreement, up to the Latest Practicable Date (the “**Review Period**”). The closing of the Shares ranged from HK\$0.99 per Share to HK\$2.71 per Share. As such, the Placing Price and Subscription Price of HK\$1.12 under the Placing Agreement and Subscription Agreement lies within the range of the closing prices within the Review Period.

LETTER FROM THE BOARD

The Board noticed that the Share price has increased substantially from April to May 2015. For a better reference, the Board is of the view that a longer period of time should be used for the reference to the Placing Price and Subscription Price.

The chart below illustrates the movement of the daily closing Share prices in HK\$ per Share during the Review Period:

In addition to the Share price analysis, the Company also takes into account (i) the Company needs additional funding to finance the Brazilian iron ore project and for development of new energy vehicles related projects as soon as possible; (ii) the chance of obtaining of the approval of debt financing is low for the Company as discussed in the section named “Other fund raising alternatives”; (iii) the net asset value per Share of the Group of HK\$0.61 (based on the audited net assets value as at 31 December 2014 HK\$4,072.5 million and the total issued Shares of 6,644,571,606 Shares as at 31 December 2014); and (iv) on 9 March 2015, the Company and New Hope Group Co. Ltd (the “**New Hope Group**”) entered into the Memorandum of Understanding pursuant to which, it is proposed that the Company will issue and New Hope Group (or such person(s) at its direction) will subscribe for the two-year, zero coupon convertible bonds in principal amount of no less than HK\$240,870,000 and no more than HK\$1,379,730,000 at a conversion price of HK\$1.11 per Shares; and the Company will grant and New Hope Group (or such person(s) at its direction) will subscribe for a options with an exercise price of HK\$1.32 per option share. More details of the convertible bonds and options mentioned in this section has been disclosed in the announcement of the Company dated 11 March 2015. It is reasonable that the potential investor would only accept the Placing Price and Subscription Price near the lower price during the Review Period after taking into the account all the above factors.

LETTER FROM THE BOARD

As such, we consider that (i) the Placing Price and Subscription Price of HK\$1.12 under the Placing Agreement and Subscription Agreement was arrived at after arm's length negotiation, and are on normal commercial terms; and (ii) the entering into the Placing Agreement and Subscription Agreement are fair and reasonable and in the interests of the Company and the Shareholders as a whole.

Conditions of the Subscription

Completion of the Subscription is conditional upon:

- (i) the Listing Committee of the Stock Exchange granting the listing of, and permission to deal in, the Subscription Shares;

- (iii) the grant of approval by the Shareholders on the Subscription Agreement and the transactions contemplated thereunder (including but not limited to the issue of the Subscription Shares) at the EGM.

LETTER FROM THE BOARD

Brazilian iron ore project

Sul Americana de Metais S.A. (“SAM”), a subsidiary of the Company, is devoted to develop Block 8, named as Vale do Rio Pardo, as phase I of operation with an annual production capacity of 25 million tons (with a possibility to expand it to 27.5 million tons) of 66.5% or above iron concentrate. The project will have an integrated system comprised an open-pit mine, a beneficiation plant, a 480km underground slurry pipeline, filtering plant and port for product export. The measured and indicated iron ore reserves of Vale do Rio Pardo are estimated at 2.6 billion tons with average 19.7% Fe at a Fe cut-off of 14% based on JORC Code. The ore body is shallow buried, outcrops on the present surface and inclines slightly with an average dip angle of not more than 15° which translates into approximately 640 million tons of iron concentrate for a lifespan of around 26 years.

The preliminary work in Vale do Rio Pardo includes obtaining the required licenses and approvals for starting the construction and preparation of a bankable feasibility study in accordance with the relevant requirement. For the construction of Vale do Rio Pardo project, extensive beneficiation test and completion of feasibility study, extensive engineering design for mining, beneficiation, water supply, electricity supply, pipelines and ports have to be completed. Once detailed engineering design commenced, tender for the construction project and large-scale construction work will commence. If all licenses and approvals for starting the construction are obtained in the first half of 2016, the mine is expected to commence operation by 2019.

As the relevant government authorities require more time in reviewing the relevant applications, the time to obtain the approvals is already lagging behind the estimates made by the management earlier. The Company is actively seeking to obtain all the license and commence construction as soon as possible. Other details in relation to the Brazilian iron ore project have been set out in the 2014 annual report of the Company.

FUND RAISING ACTIVITIES IN THE PAST TWELVE MONTHS

The Company has not conducted any fund raising activities for the 12 months immediately preceding the Latest Practicable Date.

OTHER FUND RAISING ALTERNATIVES

Other than raising fund by way of the Placing, the Board have also considered other fund raising methods, such as borrowings or issuance of bonds (both from banks and/or other lenders), open offer and rights issue. For bank and other borrowings or issuance of bonds, the Board is of the view that given the Company's is in a loss position (reporting a loss attributable to the owners of the Company of only approximately HK\$25,941,000 for the three months ended 31 March 2015 and a loss of approximately HK\$3,241,459,000 for the year ended 31 December 2014), it will take a long time for banks and/or other lenders to review the financial condition of the Group for the purpose of granting loan facilities for business development. The banks and/or other lenders will also likely to charge relatively higher interest rate for the loan given the Group's financial situation which if the Group accepts, will incur additional interest expenses. In respect of rights issue or

LETTER FROM THE BOARD

open offer, the Board is of the view that (i) the time taken for the completion of rights issue or open offer will be longer; (ii) it may be difficult to secure an underwriter for rights issue or open offer; and (iii) the cost in documentation works, administrative and professional fees for rights issue and open offer will be higher. On the contrary, the Placing can be completed within a short period of time subject to the Shareholders' approval with a lower cost as compared to that of rights issue and open offer. As such, the Board is of the view that the Placing would be a preferred fund raising method among other alternatives.
