

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a high investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

For the nine months ended 30 September 2012, the Group's turnover increased 1.6 times to HK\$2,129.9 million compared to the same period in prior year, which was mainly attributable to the substantial increase in trading of metals and mineral resources that contributed HK\$2,121.9 million revenue to the Group. The trading business recorded a loss of HK\$7.6 million during the period, of which Brazil Xianglan incurred a loss of HK\$8.0 million.

Our silicon business achieved a turnover of HK\$8.0 million, representing a decrease of 82% compared to the same period in 2011 as the silicon market has become saturated since the beginning of the year. Segment loss for the period increased by 66% to HK\$2.1 million, which was mainly due to the fixed overhead of the factory.

Resources of Xianglan Brazil has no significant change in 2012. For the three manganese licenses held by Xianglan Brazil, the Company has been considering between self development and reselling. In the past year, the price of manganese ores was ever decreasing. As the Company has concentrated its financial resources on the SAM iron mining project, no further geological work was done on the Manganese project. The Company does not rule out the possibility to seek for reselling the Manganese project in due course.

The decrease in trade and bills receivables, and prepayments and other receivables totalled HK\$457.4 million are in line with the decrease in trade and bills payables, and other payables, accrued expenses and receipts in advance and borrowings totalled HK\$530.4 million, which was result from the increase in the rate of settlement of accounts and the repayment of borrowings in 2012.

As at 30 September 2012, the gearing ratio of the Group which is measured by total borrowings to total equity was 0.03 (31 December 2011: 0.46).
